

blo.kart[®]

fun, fast, compact!

ispo | dupont BrandNew Summer Hardware winner 2001

Innovations Award 2000 - Outdoor category

fun

blokarting is rapidly becoming the worlds number one land based sail sport. Being one design, it is ideal for both recreation and competition so that everyone, from kids to grandparents, adrenalin junkies and the disabled can enjoy blokarting.

blokart strictly endorse the use of safety equipment with all aspects of blokarting. Some of our photography is staged with professionals. Safety is paramount so please ensure safety belt, a helmet and appropriate footwear are worn.

The fastest recorded speed in a blokart is 93kph (57mph)

fast

Able to accelerate quickly, the blokart is perfect for tight pack situations in small areas. Being light and stable it allows for close exciting action, much like speedway or motocross racing.

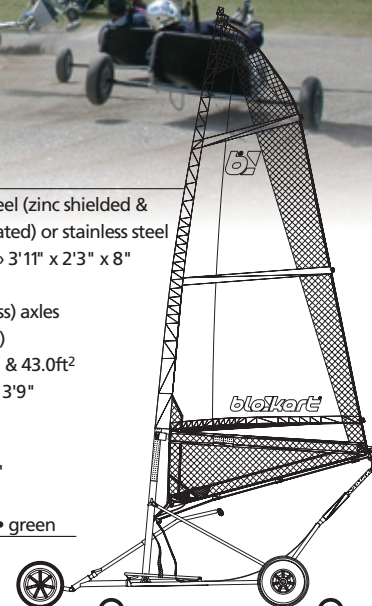

compact

Because of its small size and extreme manoeuvrability the blokart can be used almost anywhere – from beaches to parking lots, sport and recreation grounds, tennis courts and now even on ice!

Weighing only 27kg (55lbs), the blokart is portable enough to fit in the trunk of most cars. It can be assembled from its unique carry bag without tools in a few minutes.
